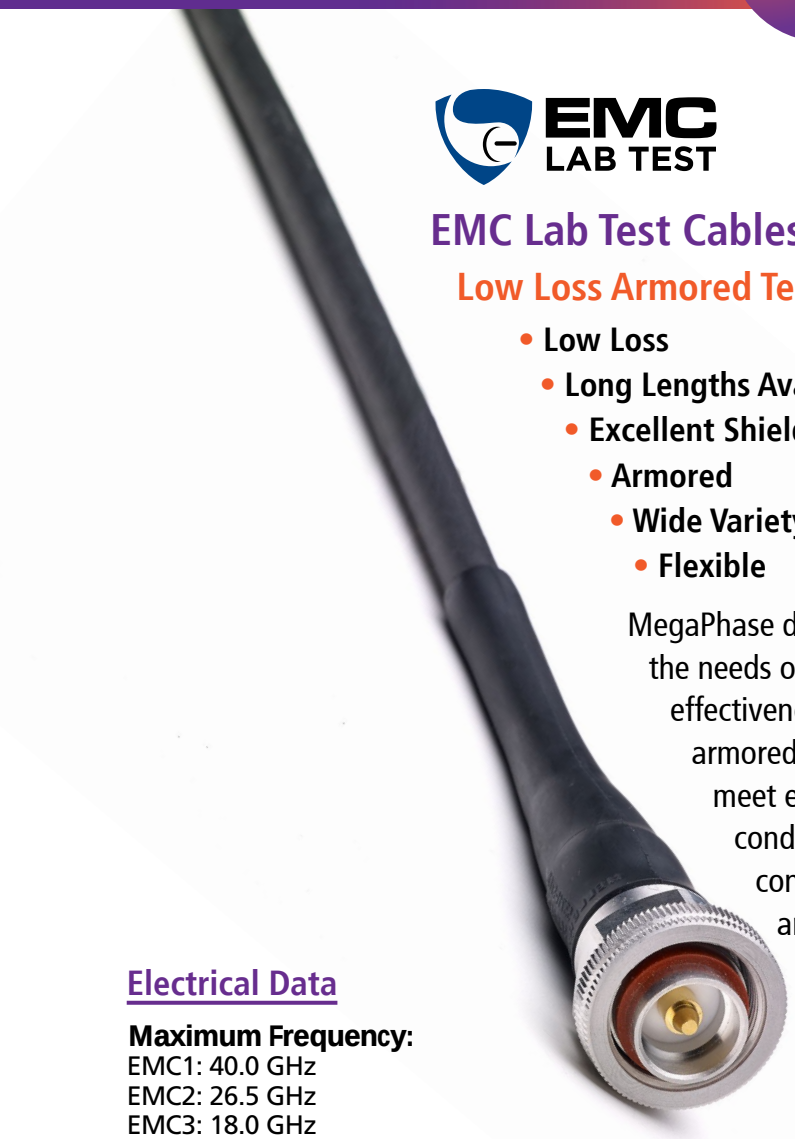
EMC Lab Test Cables to 40 GHz

Low Loss Armored Test Cables for Compliance Measurements

- Low Loss
- Long Lengths Available
- Excellent Shielding -110 dB
- Armored
- Wide Variety of Connectors
- Flexible



MegaPhase designed its EMC series test cable specifically for the needs of EMC lab technicians. With assembly shielding effectiveness of -110 dB, these low loss, ultra-rugged armored cables are constructed using materials that meet electromagnetic compatibility standards including conductive interface gaskets. Phase matching, alternative conductive jackets (such as Ferrite), and long lengths are just some of the features available for EMI/RFI test environments including transient and spurious emissions measurements.
